Product Features

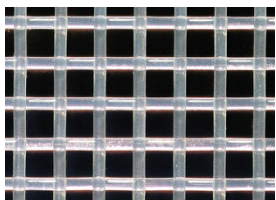

Material features

Sefar offers a wide range of filtration media and highly industrialized fabrication capabilities.

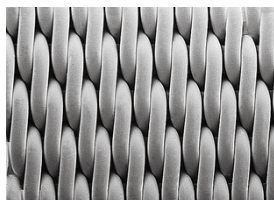

Inherent to our synthetic materials are:

- Good fatigue properties compared to metal mesh
- Easy to handle and no sharp edges
- High strength and tear resistance
- Non-shedding properties

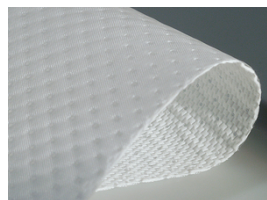

Open mesh fabric

Closed mesh fabric

Depth filter material

Sefar Inc.

- High precision and reliable mesh opening
 - Low pressure drop
 - Various surface modifications available
 - High performance polymers for extreme and harsh conditions
- Highly efficient particle retention
 - High throughput
 - Excellent surface properties
- Highly efficient particle retention
 - Low pressure drop
 - Resistant to corrosion caused by fuels and blends
 - Maximized filtration area
 - State-of-the-art bonding technology

Fabrication & Converting Solutions

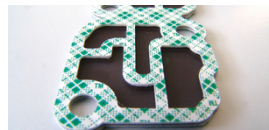

Information on our fabrication capabilities can be found by following the links below:

■ Ribbons

■ Shapes / Stamped pieces

■ Tape and Dispenser products

■ Customer specific

For further information please call us, we will also gladly send you fabric samples!
