

SEFAR GLASSLINE

The screen printing mesh efficiency champion for printing functional and decorative glass.

Mesh Features

SEFAR GLASSLINE is the screen printing mesh of choice when it comes to produce various sizes of stencils for the glass industry. SEFAR GLASSLINE provides the most reproducible printing results for glass applications in cars, buses, trucks and special vehicles. It also offers exceptional image quality and durability for functional and decorative exterior and interior construction glass, as well as in home appliance glass applications.

- Precise mesh geometry with balanced and low elongation
- Adhesion optimized surface treatment
- Exposure-optimized yellow mesh coloration
- Good antistatic behavior thanks to Sefar antistatic treatment
- Knot and fault indication
- Industry specific product range up to a mesh width of 4 meters
- Manufactured to meet the highest industry standards

Your Benefits

Screen / stencil maker benefit

- Efficient stretching process due to the low and balanced mesh elongation
- Best reproduction of tension values, as the mesh geometry is precisely maintained
- Excellent stencil adhesion
- Reliable and homogeneous coating with emulsion
- Compatible with all standard emulsions
- Accurate reproduction from the artwork to the stencil
- Reducing susceptibility to dust in the stencil production
- Reduction of retouching
- Efficient, rational stencil production

Printer benefit

- Best repeatability of ink or paste deposit
- Consistently high print quality
- Reduction of costs due to longer stencil life
- Less downtime due to premature stencil breakdown on the printing press during high volume printing
- Best edge definition and detail reproduction of heating conductor lines as well as of fine functional and decorative elements
- Production reliability due to reduced risk of electrostatic charge
- Reduction of waste and increased production efficiency
- No surprises on press due to a

- and quality control
- missed knot
- Cost reduction thanks to the optimization
- Process reliability thanks to the high quality stencils
- Repeatable and uncompromising print quality

Applications

- Automotive glass
- Construction glass
- Home appliance glass
- Hollow glass

SEFAR GLASSLINE is a wide range of medium-coarse screen printing mesh for industrial printing applications on glass. The properties of SEFAR GLASSLINE are precisely tailored to the needs of the glass industry. Its precise mesh geometry, low elongation, high tensile strength and excellent stencil adhesion, ensure a lean stencil production process an.

For unchanging quality during high production runs of window heating conductors with SEFAR GLASSLINE 77/195-48Y

For a precise and durable print image on the glass facade with SEFAR GLASSLINE 68/175-95W

Brilliant colors and crisp print edges with UV inks. Printed with SEFAR PCF 120/305-34Y
